

Jenkins:

The screenshot shows the Jenkins Dashboard in a web browser. The browser's address bar displays 'localhost:8081'. The Jenkins header includes a search bar, a notification badge with the number '1', the user 'Karthick M', and a 'log out' button. The left sidebar contains navigation links: 'New Item', 'People', 'Build History', 'Manage Jenkins', and 'My Views'. Below these are two expandable sections: 'Build Queue' (showing 'No builds in the queue.') and 'Build Executor Status' (showing two 'Idle' executors). The main content area features a 'Welcome to Jenkins!' message, a brief introduction to the dashboard, and a 'Start building your software project' section with a 'Create a job' button. Below this is a 'Set up a distributed build' section with options to 'Set up an agent', 'Configure a cloud', and a link to 'Learn more about distributed builds'.

The screenshot shows the 'New Item' page in Jenkins. The browser's address bar displays 'localhost:8081/view/all/newJob'. The page has a breadcrumb trail 'Dashboard > All >'. It features a form titled 'Enter an item name' with a text input field and a red error message: '» This field cannot be empty, please enter a valid name'. Below the form are three project type options, each with an icon and a description: 'Freestyle project' (described as the central feature of Jenkins), 'Pipeline' (described as orchestrating long-running activities), and 'Multi-configuration project' (described as suitable for projects needing many configurations). A blue 'OK' button is visible at the bottom left of the page.
