

# Test Scripts

1. How to write test scripts
2. How to check the response of scripts

## Writing a script using snippet

### Assert on Content Type:

```
pm.test("Status code is 200", function () { pm.response.to.have.status(200); })
```

### Assert on Content Type:

```
pm.test("Content-Type is present", function () { pm.response.to.have.header("Content-Type"); });
```

```
pm.expect(pm.response.headers.get("Content-Type")).to.eql("");
```
